Looks great. Really like how you linked practices to higher risks of landslides to impacts on water quality.

My apologies for the belated response on this – I have included a few additions in response to Allison's good comments.

Best regards,

Teresa

Hi Alan--

As follow up to my broad comment yesterday, here are some specific track-change edits to consider for the landslides rationale.

Happy to discuss!

Allison

Allison, Jayne and Teresa,

I reviewed Teresa's latest additions to Chris's initial draft of the landslides rationale document and expanded it a little to reinforce some specific areas. I am only sending this to you three because it appears you three commented on Chris's initial draft. If you get a chance, please take a quick look at this and let me know what you think. I will incorporate your feedback then send it out to the rest of the team, plus the "landslides" reviewers. I hope it is getting close. It would be good to clean this up and have it ready to for the next CZARA Management meeting which I think it is Sept 3<sup>rd</sup>. I will be in Portland on Monday then in the office Tue – Thur.

Thanks to all of you for putting this together.

Alan
